Quality Parts for the Yamaha Engines

SHARK BITE!

CDI Electronics manufactures replacement Yamaha stators for the 3, 4, and 6 cylinder outboard engines from 1984-1996 engines. New technology is used in the design of the capacitor charge coils, providing less winding resistance, but still generating sufficient ignition voltages. 2 Year warranty from the date of installation.

- Quality design provides ample voltage to supply the ignition system
- Vacuum impregnation with Class 200 insulating material will protect the critical high-voltage and battery windings
- Cross-link polyethylene, multi-stranded, tin-coated wires provide excellent current-carrying capabilities
- Plug and play connections insure easy installation
- 2 year warranty from the date of installation
