

CDI Electronics Temporarily Closed Due to Area Power Outages

MADISON, AL – April 28, 2011

Due to the recent outbreak of severe weather in North Alabama, CDI Electronics and its surrounding area is experiencing major power outages. This has forced our company to **TEMPORARILY** close until power is restored to the area.

Local officials are estimating 4-5 days before full power is restored to North Alabama.

During this outage, CDI Electronics will be challenged to communicate with our customers. The phone and Internet systems are out of service at this time. If you attempt to call our factory, you may experience a busy signal...this is due to the loss of power to the phone network of CDI Electronics.

We anticipate being fully operational by the first of the week.

We are pleased to report that the staff and employees of CDI Electronics are safe and were spared from any significant damage during the severe weather outbreak yesterday.

We apologize for any inconvenience this power outage has caused. Again, we anticipate being fully operational by the first of the week.
